

# Book em

## Resources reservations app

### App description

The objective of the app is to let members of organizations to book resources inside these organizations. These resources can be cars, meeting rooms, video projectors, apartments, houses, rooms and services.

Organizations and resources are managed by admins. Bookings and reservations of assets/resources are also managed by admins. Some resources can be automatically booked while others need approval. It depends on the settings of each resource.

Each resource has a name and is represented by an icon. Each resource can be reserved in time slots. Each time slot can be named as well

Below are diagrams that describe the main functionalities of users and admins.
